

## Testing Your Solution

After you have completed the code in MazeSolve.cbp and successfully executed the code, open the TestSuite.cbp project.

**You are not allowed to make any changes in the TestSuite code.**

Build and Run the TestSuite project and observe the output.

The output should resemble the following screenshot

If it runs successfully without errors, it has passed all 5 test cases provided to you.

Please note that files submitted by you will be run through similar test cases.

Now you can proceed to Task 1B

Cheers!!
